PROFESSIONAL SUMMARY

Shifting from a background in law and administration into data analytics, I bring strong analytical thinking, problem-solving, attention to detail, and an evidence-based approach developed through years of reviewing complex information and ensuring accuracy. I apply the same mindset to transform raw data into meaningful insights through end-to-end analytics projects, including analysis of 7.8M+ raw Airbnb records, SQL-based pricing analysis, and interactive Power BI dashboards.

TECHNICAL SKILLS

- **Programming:** Python, SQL (Google BigQuery)
- **Data Analysis:** Pandas, NumPy, Data Cleaning, Exploratory Data Analysis (EDA), Feature Engineering
- **Visualization & BI:** Power BI, Microsoft Excel, Looker Studio, Dashboard Development
- **Version Control:** Git, GitHub

SOFT SKILLS

- **Analytical & Critical Thinking:** Trained through years of dissecting legal cases and evidence with precision
- **Attention to Detail:** Consistently accurate documentation and data verification in high-stakes legal contexts
- **Evidence-Based Reasoning:** Structuring conclusions strictly from verified facts and data — directly transferable to data-driven decision-making
- **Adaptability & Self-Directed Learning:** Independently built 3 end-to-end analytics projects while transitioning careers
- **Communication & Reporting:** Translating complex findings into clear, actionable summaries for non-technical stakeholders

PROFESSIONAL EXPERIENCE

Data & Administrative Analyst — UM Surabaya Legal Services Institute

Nov 2024 – Present

- Improved documentation accuracy across legal case records by classifying, cross-checking, and organizing data in structured Excel tracking systems, ensuring error-free records before internal review.
- Streamlined cross-functional reporting turnaround, as measured by faster retrieval and easier hand-off of case data between teams, by standardizing legal and administrative data into consistent, well-structured reporting formats.
- Supported reliable case-management decision-making, as measured by complete and audit-ready case documentation, by systematically collecting, verifying, and maintaining administrative and legal datasets.

PROJECTS

Inside Airbnb NYC Market Analysis & Power BI Dashboard

github.com/afriqil/Inside-Airbnb-Newyork

- Analyzed 7.8M+ raw Airbnb records from listings, calendar, and neighbourhood datasets; cleaned and validated the data, then created dashboard-ready fact and dimension tables with Python (Pandas).
- Designed a 4-page Power BI dashboard with DAX measures covering executive KPIs, borough/neighbourhood performance, pricing and revenue patterns, capacity segments, host portfolio behavior, and superhost performance.

Apple Product Pricing Analysis

github.com/afriqil/Apple-Product-Pricing-Analysis

- Processed and standardized 80,000+ product records, built SQL models in Google BigQuery, and delivered a 3-page Power BI dashboard analyzing pricing, discounts, segmentation, and storage-based price premiums.

Dubai Residential Property Market Analysis

github.com/afriqil/Dubai-Residential-Property-Market-Analysis

- Analyzed 18,000+ residential property transactions by cleaning data, preparing SQL summaries, and building a Power BI dashboard for sales performance, location comparison, and property-type insights.

EDUCATION

- **Bachelor of Law (Cum Laude)** — Muhammadiyah University of Surabaya, 2021 – 2025
